## **City of Laurel Receives Prestigious Sustainable Maryland Certified Award at Maryland Municipal League Conference**

**College Park, MD (October 14, 2021)** – The Environmental Finance Center at the University of Maryland announced that the **City of Laurel** was one of twelve Maryland municipalities honored at the **Sustainable Maryland Awards Ceremony** at the Maryland Municipal League's annual Fall Conference on October 12. **This year marks the 10<sup>th</sup> anniversary of the Sustainable Maryland program.**

**A detailed summary of Laurel's sustainability Actions can be found in their Certification Report, attached as a PDF.**

### **Highlights of Laurel's accomplishments include:**

- The City began a curbside organic composting pilot program in August 2019 with 200 households participating. The compost program for the full year of 2020 collected 30 tons of food waste, resulting in a diversionary rate of \$1,928. The tonnage diverted represents the equivalent of 47,618 pounds of CO<sub>2</sub> saved. The pilot program was so successful that it has been expanded to include local businesses, and 300 more households.
- Implemented LED lighting replacement program for the City-owned street lights.
- Adopted legislation prohibiting plastic bags in retail establishments, and provides education on purchasing reusable, biodegradable and compostable alternatives.

“I am pleased that the City of Laurel has earned another three-year certification from Sustainable Maryland,” said **Mayor Craig Moe**. “For years, the City of Laurel has been committed to creating a healthy, sustainable environment for our current and future residents. To support and further that goal, we have created the new Environmental Program Manager position to promote and streamline all our programs to move our community towards a more sustainable future. The City is committed to working with all organizations and local governments to provide a healthy, safe environment for all of our residents. I personally appreciate all the work and resources that Sustainable Maryland provides to the local governments to help us achieve our goals.”

According to **Mike Hunninghake, Program Manager for Sustainable Maryland**, “During the first 10 years of the Sustainable Maryland program, if we have learned anything, it’s that reducing our footprint on where we live, be it a town, a county, a state or the planet, is vital to our continuation as a species. The work being done at the local level forms a foundation, by example and by action, for upward pressure on governments at all levels to take action to make our communities greener, cleaner and more resilient.”

**Sustainable Maryland Certified Municipalities as of 2021 (10th year of the program):**

- Total Municipalities Sustainable Maryland Certified: **40 (26% of Maryland's municipalities)**
- Total Municipalities Sustainable Maryland Registered: **85 (54% of Maryland's municipalities)**

---

**About Sustainable Maryland:** Sustainable Maryland is an initiative of the **Environmental Finance Center at the University of Maryland** that is designed to support Maryland's 157 municipalities as they look for cost-effective and strategic ways to protect their natural assets and revitalize their communities. Using best practices in resource areas like water, energy, planning, health, food, and economy, a municipality can earn points toward sustainability certification. Sustainable Maryland offers a customizable menu of concrete actions, allowing communities to select initiatives that best fit their specific needs. This free and voluntary program, with the support of the **Maryland Municipal League and the US Environmental Protection Agency** helps communities choose a direction for their greening efforts; complete their chosen actions with help from program tools, trainings, expert guidance, and other resources; and be recognized statewide for their accomplishments.
